Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Amin (U.S.5875187).

Amin teaches (figure 3 and abstract) a method of signal processing to determine a message in a multiplexed digital signal, wherein a voice channel assignment subchannel for voice channel assignment signals, and a short messaging subchannel for short messaging signals is time-division multiplexed in the digital signal, comprising: receiving the multiplexed digital signal; demultiplexing the multiplexed digital signal to generate a short messaging signal and a voice channel assignment signal; screening the voice channel assignment signal from further processing; and determining the message from the short messaging signal.
